FLEX YOUR ENGINE

August 9, 2011

To whom it may concern.

The antimicrobials used in food grade Bel-Ray No-Tox product are for internal (product) use only. Bel-Ray No-Tox products do not kill "on contact" nor do they have antiseptic properties. The antimicrobials used in Bel-Ray No-Tox products keep bacteria, yeast and molds from growing in the lubricants and being transferred to food or machinery, particularly when water get into machinery.

Sincerely,

William Gay
Technical Service Manager
Bel-Ray Company, Inc.
