RE: PFAS Statement for Bel-Ray No-Tox Products

Dear Valued Customer,

The following Bel-Ray products contain intentionally added PTFE (Polytetrafluoroethylene) that meet FDA Regulations under 21 CFR 177.1550 and 21 CFR 175.300 for incidental food contact applications:

- No-Tox HD Food Grade Grease 1
- No-Tox HD Food Grade Grease 2
- No-Tox Food Grade White Grease Aerosol
- No-Tox Food Grade Low Temp Grease
- No-Tox Food Grade EP Grease 0
- No-Tox Food Grade Syn EP Grease 1
- No-Tox Food Grade Syn EP Grease 2

We have confirmation from the supplier of the intentionally added PTFE that the PTFE complies with the Commission Delegated Regulations (EU) 2020/784 on PFOA and (EU) 2021/1297 on C9-C14.

In addition, all other components in the formulation have been reviewed and do not contain intentionally added PFAS. Therefore, the above listed products are not expected to contain per- and polyalkyl substances (PFAS), perfluorooctanoic acid (PFOA), or perfluorooctane sulfonic acid (PFOS).

If you have any questions, please do not hesitate to contact the Calumet Product Support Group.

Sincerely,

A handwritten signature in black ink that reads "Raymond Drost".
